

Protect yourself against fires

Fire detectors save lives

A fire detector will quickly sound the alarm if a fire starts. This will allow you the time to get out of the building if necessary.

Always fit fire detectors on the ceiling.

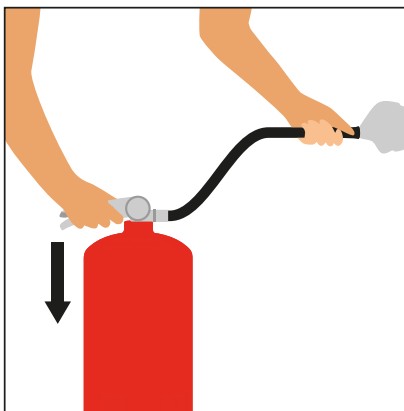

Test the fire detectors at regular intervals.

Put out the fire only if you can

Fire in a pan. Cover with a lid.
Never try to put out a pan fire with water!

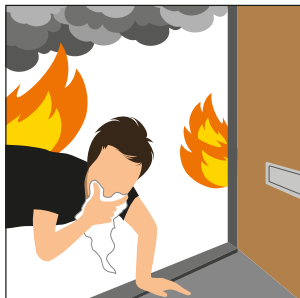

Hold down the handle.

ENGELSKA

Smoke kills

If a fire starts in your apartment

If a fire has started – get out.

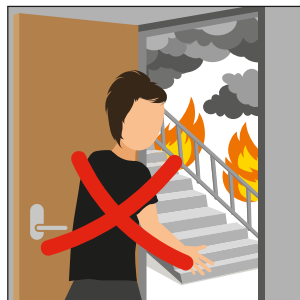

Close the door!
This stops the fire and smoke from spreading.

Call 112.

If a fire starts in a neighbour's apartment

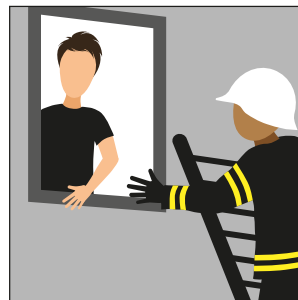

Never use a smoke-filled stairway. **Never** use a lift when there is a fire. You are safe in your apartment.

Is there smoke in the stairway? **Stay in your apartment.**

Keep the door closed.
Call 112.

The rescue service will help you out **if necessary.**
